

EnviroWand™ with Two-Sided Sleeve

Our bendable duster is a great alternative to single-use dusting pads and chemical-laden sprays and easily removes dust and dirt from even the most difficult-to-reach places!

Item #s: Teal: Regular–357047, Mini–307052

Includes: Multi-Use Handle–357054

Regular: 68.2 cm x 7.5 cm

Mini: 45.7 cm x 7.5 cm

Replacement Sleeves:

307054 - Mini

357048 - Regular

The problem

We all have those hard-to-reach places that seldom, if ever, get cleaned properly. Reaching high, tight, out-of-the-way surfaces and angles can be difficult, so these areas often go ignored. And knickknacks and other smaller items and spaces present their own set of challenges.

Norwex solution

The flexible, bendable EnviroWand™ comes in two sizes to solve a wide variety of cleaning challenges. Both attach easily to the Telescopic Mop Handle to reach high surfaces and those awkward, out-of-the-way areas. With our full-sized and mini versions, you can clean even the most hard-to-reach places – plus smaller items nooks and crannies – leaving them dust-free and shiny!

Why it's better

- Densely woven, superfine Norwex Microfibre physically removes up to 99% of bacteria from a surface with water alone when following proper care and use instructions
- Flexible, multi-functional design for easier and more efficient chemical-free cleaning
- Multi-Use Handle unscrews to reveal a bristle brush to whisk away dirt and crumbs from small and tight spaces
- Can be used wet or dry

- BacLock®, our exclusive micro silver agent, protects the cloth by inhibiting odour in the cloth, which means it's ready to use again and again
- STANDARD 100 by OEKO-TEX® certified, this product and its components have been tested against a list of over 350 harmful substances and passed, enabling you to make responsible decisions for you and your family

What your Customers will love

- Bendable and easy to use
- Two sizes are available to meet a variety of cleaning needs
- Connects to the Telescopic Mop Handle to comfortably clean hard-to-reach areas
- Removable sleeve for easy washing
- Additional sleeves are available

(continued on next page)

*BacLock® is an antimicrobial agent solely intended to protect and self-clean the cloth by inhibiting growth of odour-causing bacteria, mould and mildew.

All Norwex Microfibre products carry a two-year warranty. Please visit www.norwex.com/product-guarantee for complete details.

This product was independently tested for harmful substances according to the strict global criteria of STANDARD 100 by OEKO-TEX®.

How to use

- Slip sleeve on and then bend EnviroWand™ to adapt to your needs
- To use wet, remove sleeve. Dip sleeve in water, wring out excess and replace sleeve on EnviroWand™.
- To remove the sleeve for washing, straighten the EnviroWand™ and then slip the sleeve off wand
- The EnviroWand™ easily attaches to the Telescopic Mop Handle. Just squeeze the two buttons on the base and pull to remove it from the handle. Then slip the wand into the mop handle, squeeze the buttons and slide into place.
- When using on easily scratched surfaces such as brushed stainless steel, first test Norwex Microfibre on an inconspicuous spot. *Not for use on anti-glare surfaces.*

Caring for microfibre

Wash dirty microfibre with a Norwex laundry detergent and avoid bleach, fabric softeners and dryer sheets.

Demo tips

- Flex the EnviroWand™ to clean a surface that is within reach, but hard to get to, such as the top of a curtain rod, or between a TV and the inside of an entertainment centre
- Attach to a Telescopic Mop Handle and demonstrate the ease of dusting a ceiling fan or entryway light fixture
- Demo the mini version on a knickknack or in a small cranny
- Unscrew the Multi-Use Handle to show guests the bristle brush for cleaning computer keyboards and other tight spaces

Did you know

- Dust bunnies aren't just unsightly and sometimes allergenic; they may also contain toxic chemicals. Why? The many chemicals in and around our homes wind up in dust as they migrate from home products like furniture, electronics, plastics and fabric. They also come in through open doors and windows and on our shoes.
